THE LEGIONELLA EXPERTS®

Comprehensive Legionella Services

We're pleased to provide comprehensive Legionella services to help you protect your business from liability and the health of your building occupants from the risk of Legionella. This includes water management plans, compliance with *ANSI/ASHRAE 188: Legionellosis: Risk Management for Building Water Systems*, CMS, other standards and guidelines, and New York regulations.

It takes a multidisciplinary team to end Legionnaires' disease, which is why we've teamed up with Special Pathogens Laboratory, The Legionella Experts®. Combining our knowledge of water treatment with Special Pathogens Laboratory's more than 30 years of expertise in Legionella detection, control and remediation positions us to offer you evidenced-based solutions proven to prevent outbreaks.

Benefits

With our integrated services you receive:

- Safer water through Legionella control
- Single source for all your Legionella needs
- Coordinated and comprehensive program to mitigate Legionella risk
- Targeted and customized water treatment for Legionella
- Seamless integration with existing water management program

Legionella Services

No matter what level of Legionella protection you need, we give you resources and services through the ZEROutbreak® Protection program. The only validated program, designed by Special Pathogens Laboratory to prevent outbreaks, ZEROutbreak® meets and exceeds compliance standards:

- Legionella education / training
- Validated Legionella testing
- Legionella consultation
- Water management plans (ASHRAE 188, New York regulations, other guidelines and standards)
- Risk assessments and remediation planning
- Ongoing support

Why Special Pathogens Laboratory, The Legionella Experts®?

Since the 1980s, Special Pathogens Laboratory (SPL) continues to set the industry standard for Legionella detection, control, remediation, and prevention:

- Internationally recognized as clinical and environmental experts in Legionnaires' disease
- 30 years of proven success in Legionella detection, control, remediation and prevention
- Authoritative and seminal research: more than 200 articles published in peer-reviewed journals; Legionella chapters in scientific and medical textbooks
- Collaborative, multidisciplinary team: microbiology, engineering, clinical infectious diseases, public health, communication and water treatment
- Evidence-based and proactive
